

Brindleton Bike Share — Rider Handbook

Version 2.4 — Effective 2026

This handbook describes the Brindleton Bike Share program, including membership tiers, the station network, the rental process, safety rules, the damage and lost-bike policy, and answers to frequently asked questions. It is intended for new and existing riders, city partners, and customer support agents.

1. Program Overview

Brindleton Bike Share is a municipal bicycle-sharing program operated under contract with the City of Brindleton. The program was launched in 2019 and is funded jointly by the city transportation department and a public-private partnership with three local sponsor organizations. As of 2026 the program operates 1,840 bicycles across 142 docking stations, serving approximately 38,000 active members and roughly 11,000 occasional pass-holders per month.

The mission of Brindleton Bike Share is to provide an affordable, low-friction transportation option that connects residential neighborhoods to transit hubs and major employment centers, while reducing short-distance car trips in the urban core.

2. The Fleet

The fleet consists of two bike types: standard pedal bikes and pedal-assist electric bikes. Approximately 70 percent of the fleet is standard pedal bikes; the remaining 30 percent are pedal-assist electric bikes that provide motor assistance up to 25 kilometers per hour. All bikes are step-through frames designed to fit riders between 150 and 195 centimeters in height.

2.1 Standard Pedal Bikes

Standard pedal bikes are seven-speed cruisers with internal hub gearing, hand brakes on both wheels, integrated front and rear lights powered by a hub dynamo, a front carrying basket rated for 8 kilograms, and a rear cargo rack rated for 12 kilograms. They are identified by a black frame with teal accents.

2.2 Pedal-Assist Electric Bikes

Electric bikes provide motor assistance only while the rider is pedaling. The motor cuts off automatically at 25 kilometers per hour. Battery range under typical city conditions is approximately 60 kilometers on a full charge. Electric bikes are identified by a charcoal frame with orange accents and a battery indicator on the handlebar console.

3. Membership Tiers

Brindleton Bike Share offers four membership options. All tiers include unlimited rides on standard pedal bikes for the included ride duration; electric bike usage and overage charges are billed separately as described in section 4.

Tier	Price (USD)	Ride Length Included	Electric Bike Rate	Best For
Single Ride	3.50 per trip	30 minutes	0.20 / min	First-time riders
Day Pass	12.00 per day	Unlimited 45-min rides	0.18 / min	Visitors, tourists
Monthly	22.00 per month	Unlimited 45-min rides	0.15 / min	Daily commuters
Annual	169.00 per year	Unlimited 60-min rides	0.12 / min	Year-round riders

The Monthly membership is the most popular option and accounts for roughly 54 percent of active memberships. The Annual membership offers the lowest effective per-ride cost and is recommended for riders who use the service more than four days per week.

4. Overage and Electric Bike Charges

If a ride exceeds the included ride length, the rider is charged 0.10 USD per minute of overage for standard bikes, billed automatically to the payment method on file. Electric bike usage is billed at the per-minute rate listed in section 3, regardless of tier. A maximum single-ride cap of 25.00 USD applies across all tiers, after which the ride is considered abandoned and section 7 charges may apply.

5. Station Network

Stations are located across the central business district, the four primary residential districts, and along the river greenway. Each station has between 12 and 40 docks. Riders can pick up a bike at any station and return it to any other station within the service area. Real-time station availability is shown in the Brindleton Bike Share mobile app and on the program's public map at brindletonbikes.example.

If the destination station is full when the rider arrives, they may either ride to the next nearest station or use the in-app overflow feature, which adds 15 minutes of free ride time and provides directions to the closest station with available docks.

6. Safety and Rules

Riders must be at least 16 years old to use Brindleton Bike Share. Helmets are strongly recommended but not provided by the program; riders may purchase a foldable helmet at the downtown service center for 35.00 USD. Riding on sidewalks is prohibited in the central business district and on streets with marked bicycle infrastructure. Riders must obey all traffic signals and yield to pedestrians at all times.

Bikes may not be used to transport additional passengers, carry loads exceeding the rack ratings, or be taken outside the marked service area shown in the mobile app. Violations may result in account suspension and forfeiture of any prepaid membership balance.

7. Damage, Loss, and Theft Policy

If a bike is damaged during a rental, riders are responsible for reporting it through the app at the end of the ride. Minor damage reported promptly carries no fee. Major damage judged to be the result of misuse or negligence is billed to the rider on a sliding scale based on repair cost, capped at 250.00 USD.

A bike is considered lost if it is not returned to a station within 24 hours of the start of the ride. After 24 hours, a temporary hold of 1,200.00 USD is placed on the rider's payment method. If the bike is recovered within seven days, the hold is released minus the applicable overage charges. If the bike is not recovered, the hold is converted to a full replacement charge.

Theft of a bike by a third party while in the rider's custody must be reported to the local police within 12 hours, with the case number provided to Brindleton Bike Share within 48 hours. Documented theft cases are not billed to the rider, subject to verification.

8. Customer Support

Customer support is available daily from 06:00 to 23:00 local time. Riders can reach support through three channels: the in-app help center, email at support@brindletonbikes.example, and the downtown service center walk-in desk at 217 Riverside Avenue. Average response time for in-app messages is under five minutes during operating hours.

Refund requests are reviewed within 48 hours and, if approved, processed to the original payment method within 5 to 10 business days. Membership cancellations take effect at the end of the current billing period; no partial-month refunds are issued except for documented service outages exceeding 72 consecutive hours.

9. Privacy and Data Handling

Brindleton Bike Share collects ride telemetry, including start and end stations, route GPS traces, and ride duration. This data is used to balance the station network, plan future stations, and provide aggregate ridership reports to the city transportation department. Individual ride data is never sold to third parties. Riders may request a full export of their data or full deletion of their account by emailing privacy@brindletonbikes.example. Account deletion requests are processed within 30 calendar days.

10. Frequently Asked Questions

10.1 Can I bring a child on the bike?

No. Brindleton bikes are designed for a single rider and may not be used to carry additional passengers, including children. Riders looking to ride with children should consult the city transportation department for family cycling resources.

10.2 What payment methods are accepted?

Brindleton Bike Share accepts Visa, Mastercard, American Express, and Discover. Apple Pay and Google Pay are supported in the mobile app. Cash payments are accepted at the downtown service center for Day Passes only.

10.3 What happens if it rains during my ride?

Bikes operate normally in light to moderate rain. The program suspends service when severe weather warnings are issued for the service area; affected riders receive a notification through the mobile app and any active ride time is paused automatically.

10.4 Can I reserve a bike in advance?

Bikes cannot be reserved in advance. However, the mobile app allows riders to hold a specific bike at a station for up to 5 minutes while they walk to it.

10.5 Is there a student discount?

Yes. Verified students at any of the three universities in the Brindleton metropolitan area receive a 35 percent discount on the Annual membership. Verification is handled through the SheerID partner platform during signup.

11. Contact Information

Brindleton Bike Share Program Office
217 Riverside Avenue, Brindleton
Customer support: support@brindletonbikes.example
Privacy and data requests: privacy@brindletonbikes.example
Press inquiries: press@brindletonbikes.example
Service hours: daily 06:00 to 23:00 local time

This document is a fictional test corpus generated for evaluating retrieval-augmented generation systems. Brindleton Bike Share is not a real program. Any resemblance to existing programs or businesses is coincidental.
